

LIFE-CA

Supply essential mineral to improve growth for prawn, fish

INGREDIENTS:

Ca (in CaHPO ₄) (min)	: 1.5%
P (in CaHPO ₄) (min)	: 1.3%
Mg (in MgSO ₄) (min)	: 2.0%
Na (in NaHCO ₃) (min)	: 2.0%
K (in K ₂ O) (min)	: 1.3%
Carrier (CaCO ₃) enough	: 91.9%
Ethoxyquin (ppm)	: none
Antibiotics	: none

MAIN FUNCTION:

- Supply essential mineral for aquatic animal.
- Balance the mineral in culture environment to maintain the water quality, avoid dead algae when environment change.

USAGE&DOSAGE:

- Dissolving product with clean water, spread directly to the pond.
- Enhance molting: 0.5-1kg/1.000 m³ every 3 to 4 days.
 - 1st month: 500 g/0.1 ha
 - 2nd month: 900 g / 0.1 ha
 - 3rd month: 1,300 g/ 0.1 ha
 - > 3rd month: 1,500 – 2,000 g/ 0.1 ha
- When soft-shell: 1-1.5kg/1.000 m³.
- 7-10 days before harvesting: 1-2kg/1.000 m³ – to improve the weight.
- Time to stop before harvesting: None
