

# CaMax

## Fast dissolving and absorbing Ca

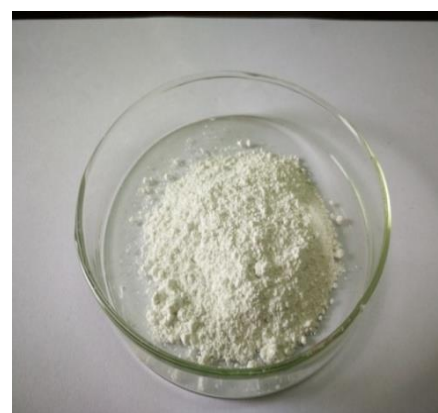

**INGREDIENTS:** Min 5% magnesium carbonate, Min 20% calcium carbonate, Max 75% zeolite Powder(carriers).

**APPEARANCE:** Powder.

**SCOPE OF APPLICATION:** Applicable to all species cultured both in fresh and sea water and brackish water, both in fish and shell fish.

**ANALYSIS OF THE PRODUCT:**

Item	Guaranteed content
$\text{Ca}^{2+}$ (from calcium carbonate)	$\geq 15.0\%$
$\text{Mg}^{2+}$ (from magnesium carbonate)	$\geq 0.2\%$
Ash insoluble in hydrochloric acid	$\leq 10.0\%$
Moisture	$\leq 5.0\%$
<i>E.coli</i>	Not Found
<i>Salmonella</i>	Not Found

### MAIN FUNCTION:

- The active organic calcium is easy to dissolve and absorb, which will help the shrimp to harden shell quickly after molting.
- Supplement minerals and trace elements, stabilize water quality.
- Adding activity factors which can significantly enhance the vitality of shrimp.

### USAGE&DOSAGE:

- Use in water, 300-400 g/1000 m<sup>3</sup>, sprinkle in the pond evenly after dissolved in water, run the aerators at the same time.
- Use 1 time every 7 days, better to use before or after intensive molting, increase the dosage to 500-600 g/1000 m<sup>3</sup> when facing soft shell or stress problem, use together with Super C to get a better performance.
- Use with feed, mix with feed 3-5 g/kg after dissolved in water, feed the animal after dry for a while.
