

# HePaPro

## Strengthen liver's activity

**INGREDIENTS:** Min 3% potassium sulfate, Min 9% magnesium carbonate, Min 3% zinc carbonate, Max 85% bentonite(carriers).

**APPEARANCE:** Powder.

**SCOPE OF APPLICATION:** Applicable to all species cultured both in fresh and sea water and brackish water, both in fish and shell fish.

### ANALYSIS OF THE PRODUCT:

| Item  | Guaranteed content |
|---|--------------------|
| K <sup>+</sup> (from potassium sulfate)     | ≥0.5%              |
| Mg <sup>2+</sup> (from magnesium carbonate) | ≥0.1%              |
| Zn <sup>2+</sup> (from zinc carbonate)      | ≥0.2%              |
| Ash insoluble in hydrochloric acid          | ≤5.0%              |
| Moisture                                    | ≤5.0%              |
| <i>E.coli</i>                               | Not Found          |
| <i>Salmonella</i>                           | Not Found          |

### MAIN FUNCTION:

- Enhance appetite, improve digestive and absorption function, thereby improving food intake and growth of animals.
- Activate the enzyme system efficiently, remove free radicals in body, reduce the damage of hepatopancreas caused by stress and toxin.
- Ensure the development of hepatopancreas and repair damaged cells.

### USAGE&DOSAGE:

- Use with feed, mix with feed 3-5 g/kg after dissolved in water, feed the animal after dry for around 10 minutes, use two times per day and 4-5 days as a circle.
- Use in water, 300-400 g/1000 m<sup>3</sup>, sprinkle in the pond evenly after dissolved in water, run the aerators at the same time.
